An **abandoned cart** is any cart with items added to it but no completed purchase within the current order window

15%

abandoned carts

A **recovered cart** is any cart with a purchase by the end of the next order window (after an abandoned window)

47%

recovery rate among abandoned carts

FINANCIAL IMPACT

\$35.6M

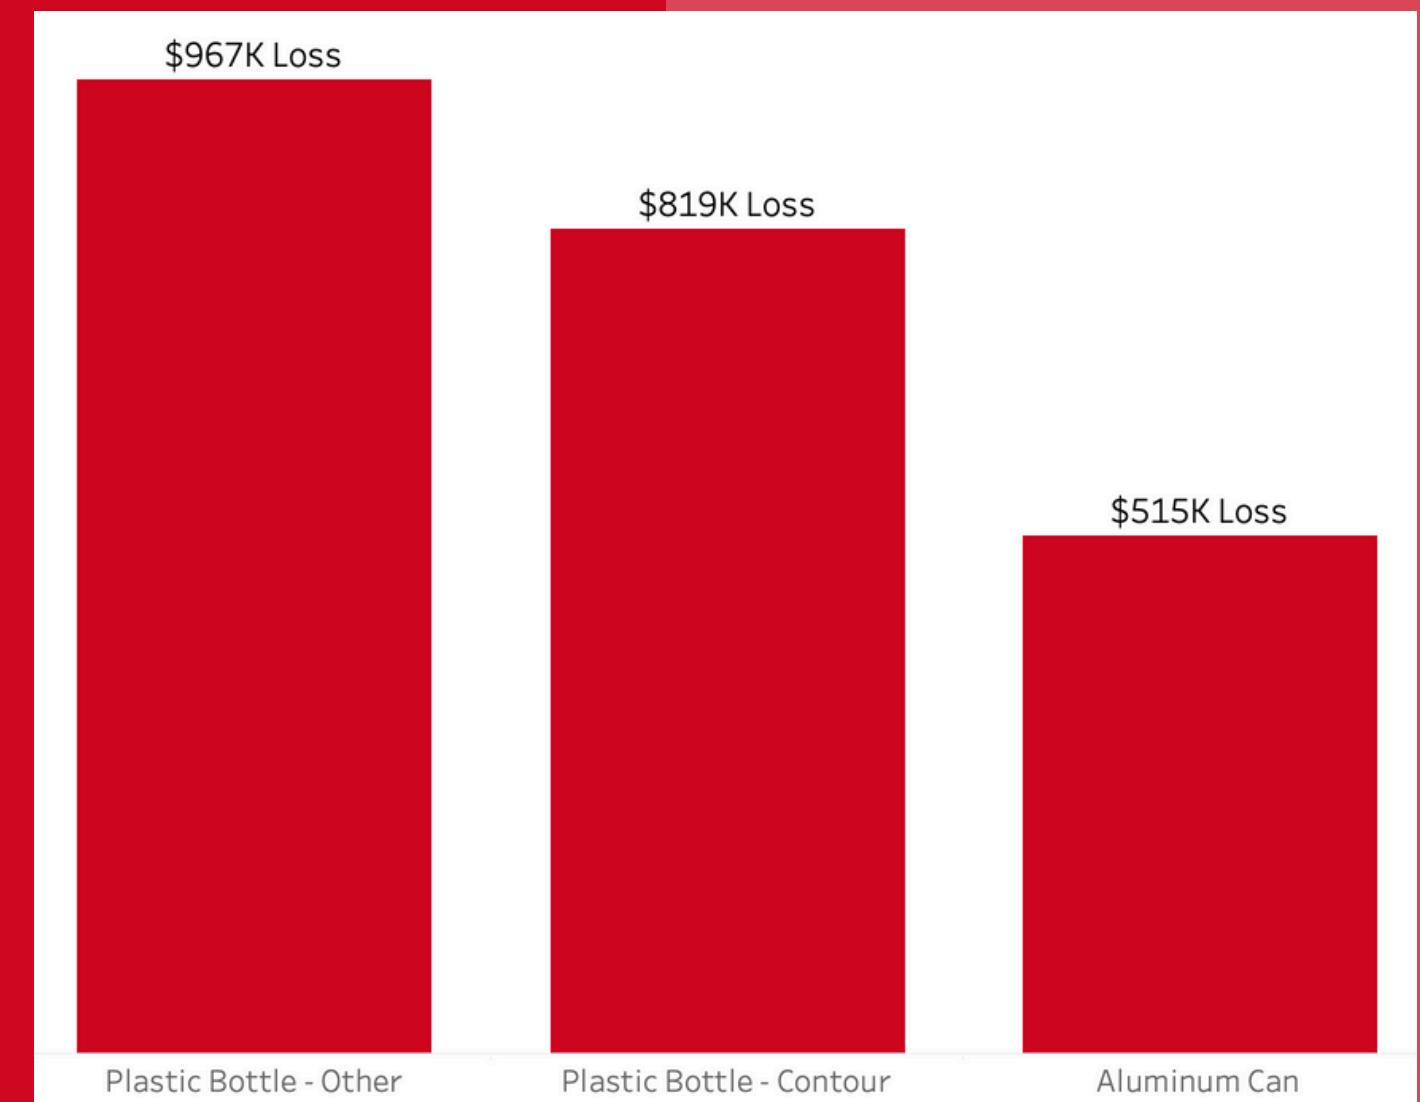

Total Revenue from Sales

\$2.9M

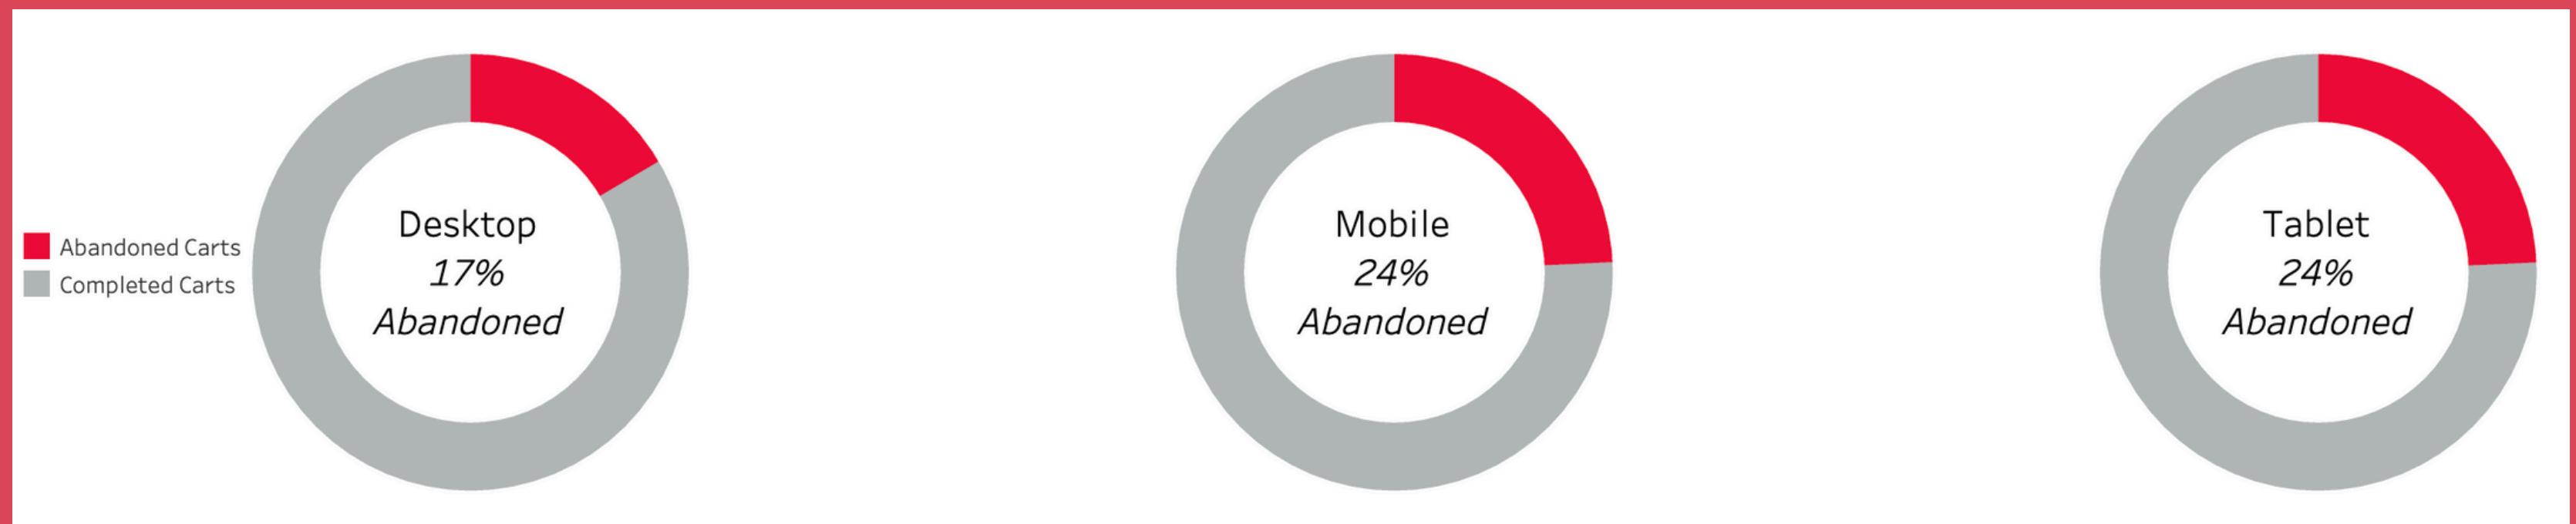

Total Revenue Lost from Abandoned Carts

8%

Loss of Total Revenue

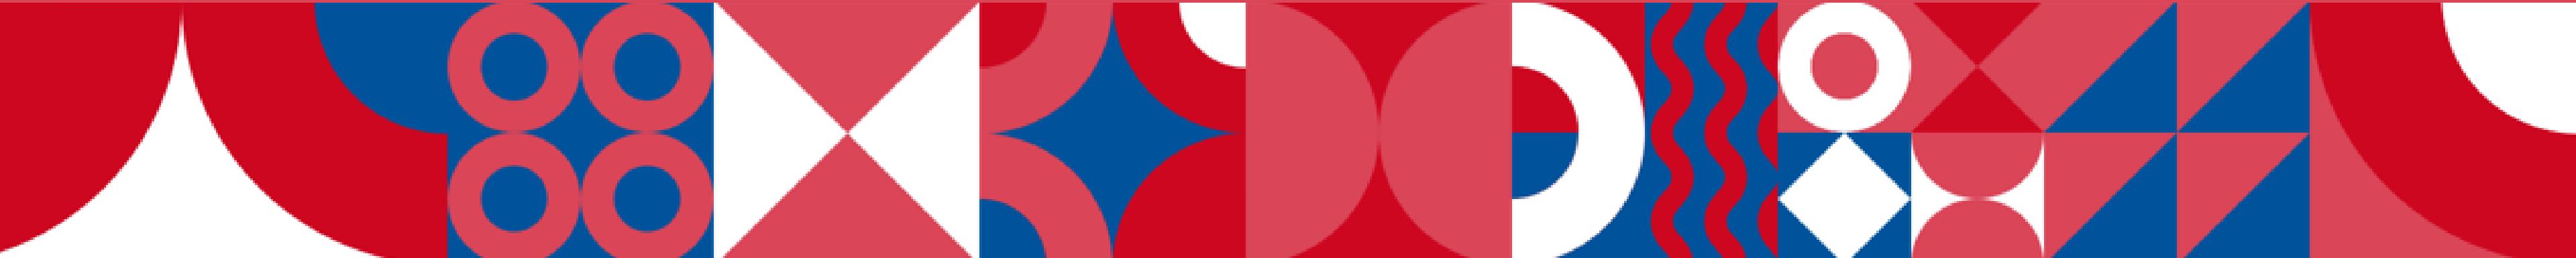

DEVICE TYPE

LOGISTIC REGRESSION

Abandoned Model

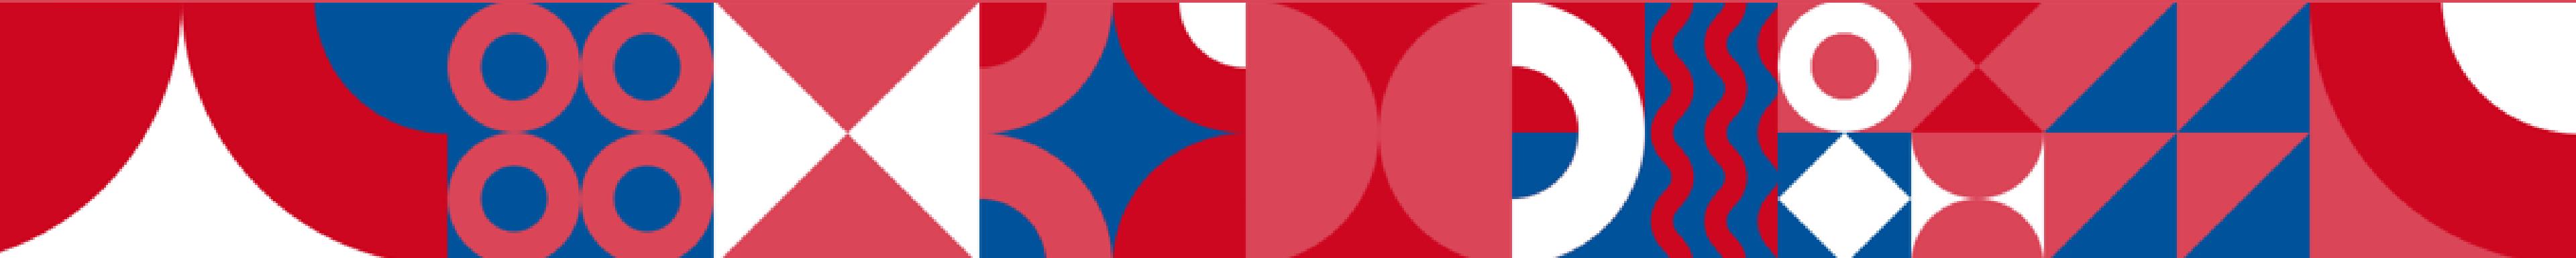

- Overall Accuracy: 59%
- Key Observations:
 - Performs better on class 0 (completed carts)

LOGISTIC REGRESSION

Recovered Model

- Overall Accuracy: 77%
- Key Observations:
 - Also Performs better on class 0 (completed carts)
- Overall: Not good at prediction for this analysis

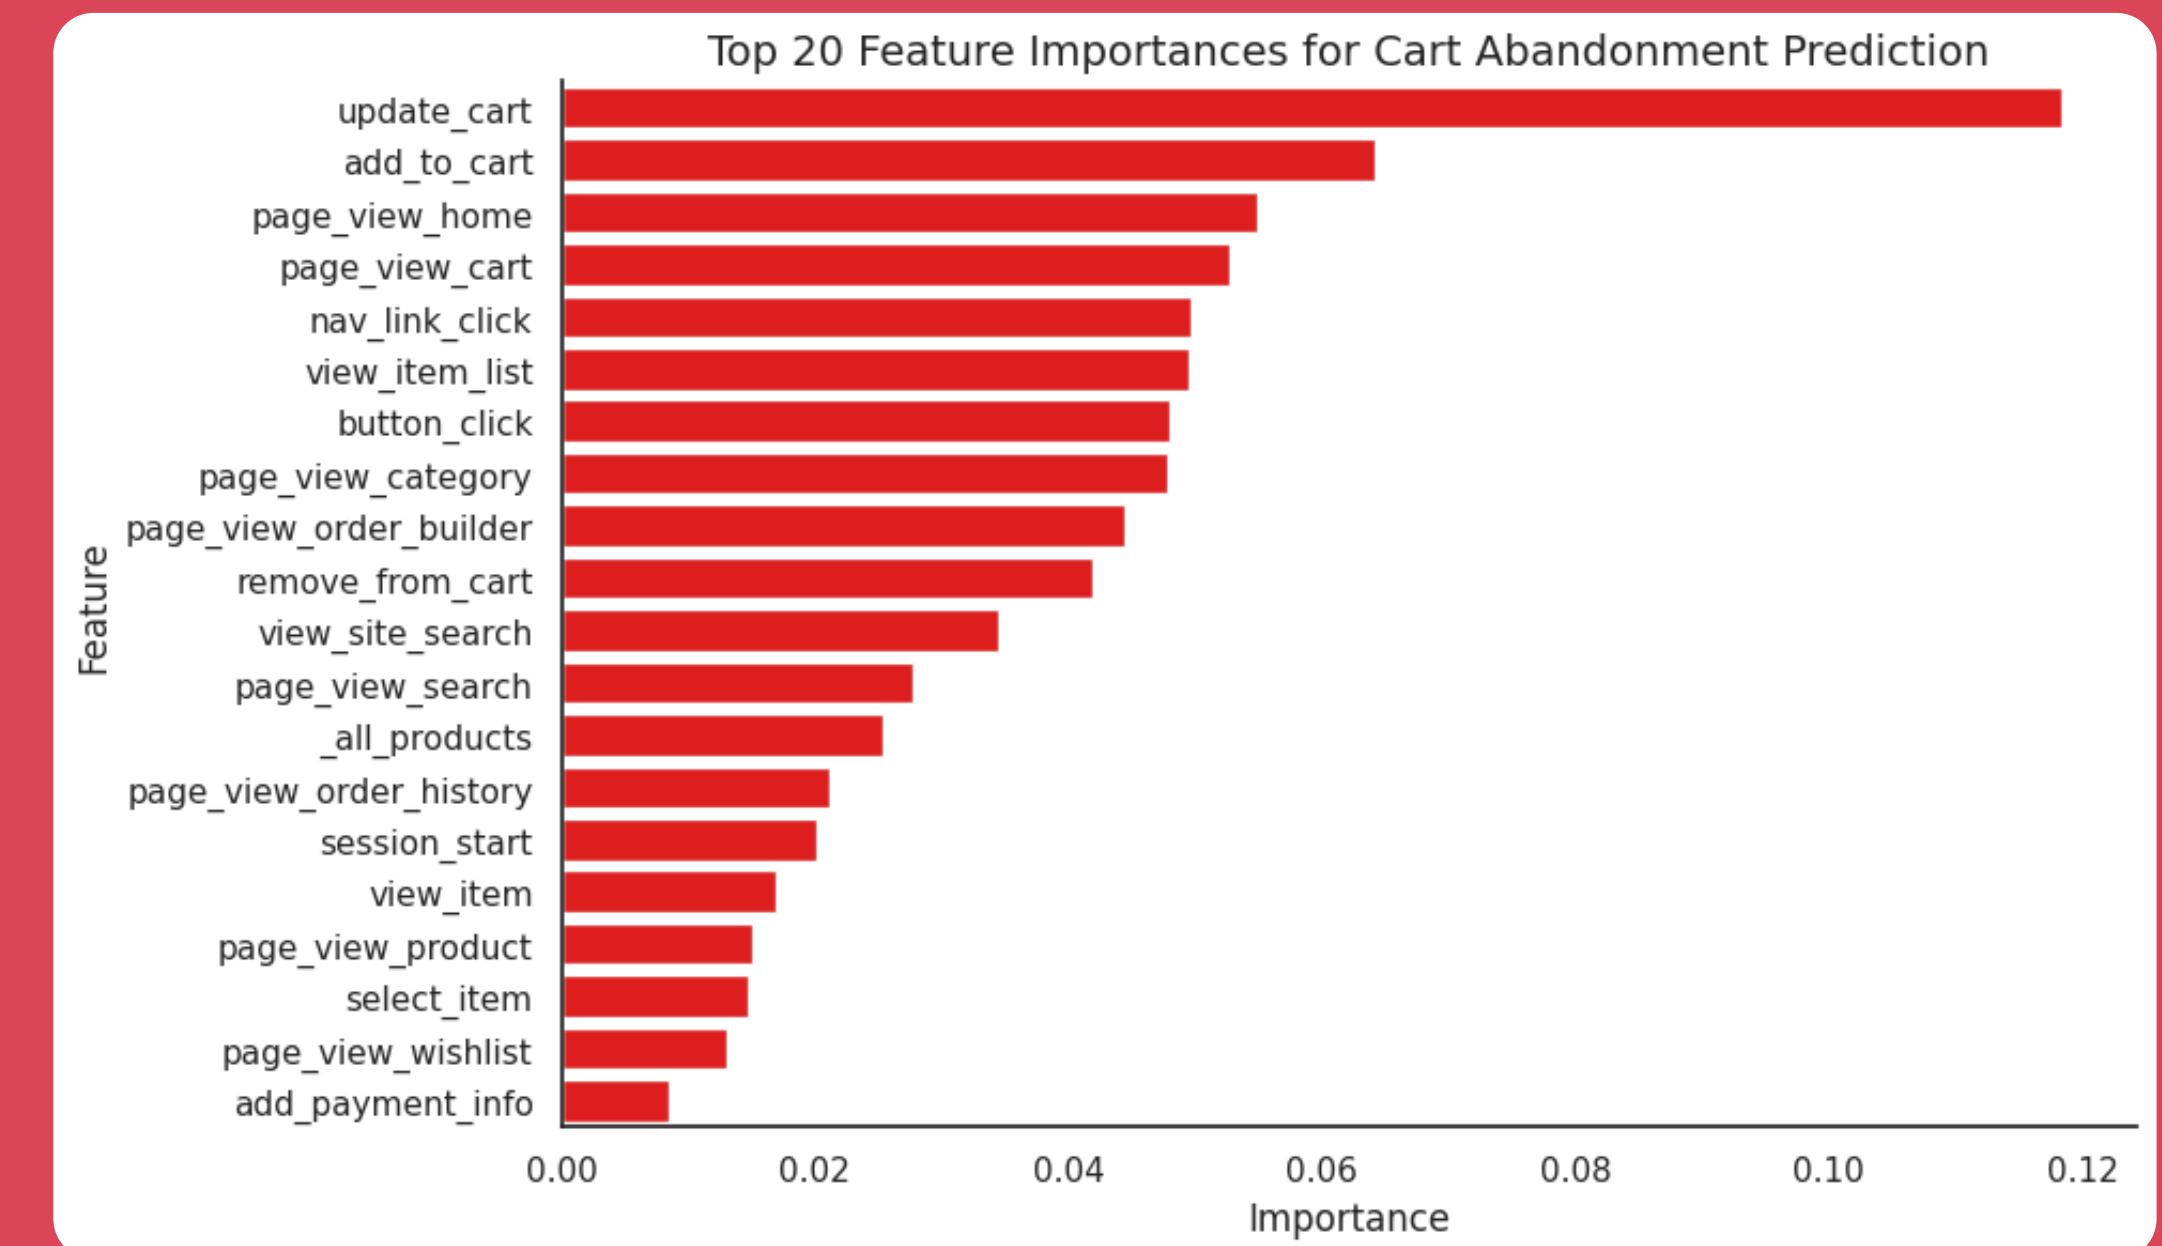

RANDOM FOREST

Customer behavior within an order window is *highly predictive* of cart abandonment

91.1%

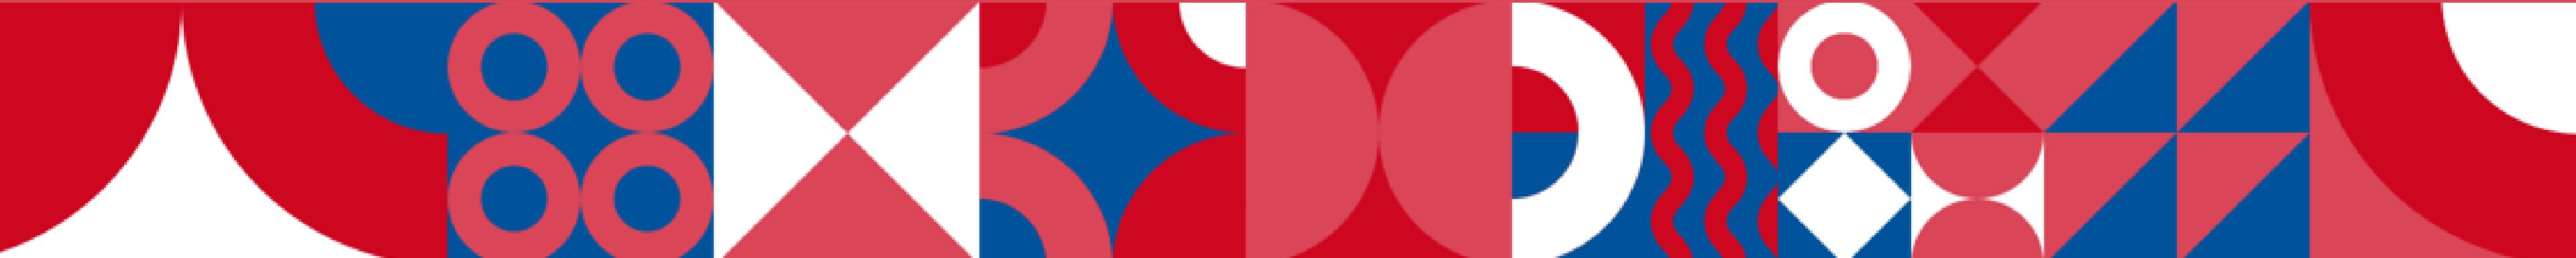

OVERALL ACCURACY

0.920
AUC-ROC

CLUSTERING

Understanding
behaviors preceding
cart abandonment

ENGAGED PRODUCT EXPLORERS AND REFINERS

- 37% of abandoned cart volume
- 21% of total estimated \$ loss
- 43% recovery rate

CUSTOMER GROUP

Active shoppers, likely performing detailed product research and refining cart
Longer decision making process
